Valuable Information for the Grower

● *Planting Table for Cold Storage Lilium Giganteum and Flowering Dates*

PLANTING DATE	FLOWERING DATE
January 1st	April 15th to 25th
January 15th	April 25th to May 5th
February 1st	May 15th to 30th
February 15th	June 1st to 10th
March 1st	June 10th to 30th
March 15th	July 1st to 10th
April 1st	July 15th to 30th
April 15th	August 1st
May 1st	August 10th
May 15th	August 20th
June 1st	September 1st
June 15th	September 15th
July 1st	October 1st
July 15th	October 15th
August 1st	November 1st
September 1st	November 25th
September 15th	December 15th to 25th
October 1st	January 1st to 10th

If LILIUM SPECIOSUM RUBRUM or MAGNIFICUM are planted on the above dates it will take six to eight weeks longer to flower than the Lilium Giganteum.

Lilium Rubrum or Magnificum should be planted June 15th to July 1st to flower for Christmas.

The above are all approximate flowering dates. If we have extremely warm weather they may flower a week earlier. It all depends on the weather conditions.

LILIES

LILIAM FLORIDI

NEW LILIAM FLORIDI

Wonderful for Pots

This new lily is a cross Giganteum and Harrisii by a grower in Florida. I sent planting stock to Bermuda where growing conditions are more favorable. For the past 3 years our grower sent us some bulbs for trial. I am satisfied that Floridi is a wonderful Lily for pots, strong grower with very firm, hard, leathery flowers. Our grower says it is the finest lily growing in Bermuda. I expect about 250 cases this year for Sept. and Oct. delivery.

PLANTS AND ROOTED CUTTINGS

For 25 years I have sold the best stock available grown by specialists. I am in touch with them and know the kind of stock they grow. Plants like other commodities must be sold according to their worth, you can buy a hat for \$3.00 and a better one for \$5.00. You will see some plants advertised for \$6.00 per 100 while other growers get \$7.50 per 100 for the same variety, why? Because they are better stock, and packed with more care, etc. Take Cyclamen for example that are advertised 2 1/4 in. from \$8.00 to \$12.00 per 100. It pays to consider the grower, the strain of seed he buys, etc., and this applies to most other plants.

HIGHLAND PARK GREENHOUSES

Dec. 1, 1936.

"We wouldn't think of replanting a bench or groundbed, no matter what it consists of, after the soil has been worked over, without applying a good dose of To-Na-Cide and lightly working the same into the surface. We have found this insecticide by far the most efficient weapon to get rid of and keep under control sowbugs and many other insect pests usually found in soil made use of under glass.

POTASSIUM PERMANGANATE

A wonderful Fungicide and Insecticide to kill fungus on seeds, pulbs, plants, and cuttings. Perfectly safe to use on seedlings, etc.

FOR SEEDS, OR SEEDLINGS, Water your seed flats after sowing, using 1/2 teaspoonful to three gallons water. You will get much better germination.

FOR BULBS, It will hasten the root action and kill thrip and fungus. On the following stubborn bulbs, Freesies, Tuberosis, Callas, Gladiolus, etc. use: 1 1/2 teaspoonful to three gallons of water. Soak the bulbs 15 to 20 hours and plant the next day.

FOR CUTTINGS, CARNATION, etc. Use 1/2 teaspoonful to three gallons of water, soak for fifteen minutes. They will root much quicker with less loss.

FOR CARNATIONS, SNAPS, GROWING PLANTS

FOR ESTABLISHED PLANTS. We know growers having wonderful success by using 3/4 of a teaspoonful to three gallons of water, watering the soil every few weeks for control of Mildew, Rust, Fungus, and Stem Rot.

WE RECOMMEND THE ABOVE,
IT IS ECONOMICAL AND SAFE

Irwin's Carnation Introductions Are Dependable

MR. CARNATION GROWER:

For the past 25 years Carnations have been one of my specialties. In 1934 I introduced "Virginia."

I had exclusive sale for two years. Growers from coast to coast and all parts of Europe tell me it is the best carnation they have bought in recent years.

For 1939 I offer two new Virginia Sports—Virginia Rose and White Virginia (pure white). Both have the same good qualities. No splits. Wonderful keepers, etc.

I will place both varieties on trial in 1937 which I consider fair to the buyer.

In the past many varieties were placed on the market without trial except on their home grounds. I think every new variety should be tried out in different sections of the country before they are offered to the trade.

I feel confident that carnation growers will welcome a "White Virginia" and "Virginia Rose" a more pleasing shade of pink than Ward. Up to date many growers have placed their orders for both varieties. I am now booked up for December 1938 and am now booking for January, 1937, so I suggest that you place your order soon as possible to get in on January delivery.

Other varieties that I put on the market exclusively in the past were "Dandy", a sport of Morning Glow. Sceptre and Improved Giant Laddie.

This year I offer to the trade the best White Freesia ever offered. Schroders White Perfection. Patent No. 237. I have sent it out on trial to about forty leading Tressia growers for the past three years. All of them have confirmed my claim. A strong grower with 24 inch stiff stems. earlier than Purity or Superflora with fine firm fragrant flowers as large as Golden Daffodil. See page 19. Also note on page 20 my 1935 introduction—New Ageratum Irwins Purple Beauty. Every one who bought some tell me it is without doubt the best ageratum on the market.

Mr. Fritz Bahr Says:

HIGHLAND PARK GREENHOUSES

Dec. 1, 1936.

"We wouldn't think of replacing a bench or groundbed, no matter what it consists of, after the soil has been worked over, without applying a good dose of To-Na-Cide and lightly working the same into the surface. We have found this insecticide by far the most efficient weapon to get rid of and keep under control sowbugs and many other insect pests usually found in soil made use of under glass.

Other Insecticides, and Descriptive Information

For additional information, ask for our circulars and booklets, which we will gladly send on request.

Important Information

Non-warranty. We endeavor to send out only the very best quality of cuttings, plants, bulbs, seeds, etc., and do our utmost to assure you of stock true to name, although we do not guarantee this. Neither do we in any way guarantee the success of the grower purchasing the stock offered in this catalog. In the event of the stock not being true to name, our liability is limited to the invoice value at the time of shipment. If our goods are not accepted on these conditions, no sale is made thereof and you must return goods at once.

We recommend all shipments to go by express, except very small shipments which can be readily mailed. Claims cannot be collected when cuttings are shipped through the mail, hence we recommend express, because a claim can be entered for damages through delay, etc. We mail small quantities only up to May 1—it is unsatisfactory to mail cuttings when the warm weather sets in.

Postage. 100 cuttings, add 15c extra for postage. For each additional 100, add 5c more. For *Special Handling Service* (which we highly recommend), add 25c for each shipment—it's worth while.

Claims for damages. You must enter a claim against the express company immediately. According to law, the transportation companies are the agents of the buyer, and when goods are delivered to and accepted by such agencies the shipper's responsibility ceases. We will, however, gladly assist you in making your claim if you advise us.

Prices. All prices in this catalog are subject to change without notice.

Unless otherwise quoted we sell 250 of a variety at the 1000 rate. Orders for less than 100 see price table page 1.

Terms. 60 days net, less 2% cash in 10 days, or less 3% cash with order. Postage and express charges must be paid by the customer.
